

PENCIL COIL CATALOGUE

PENCIL COILS/ INTEGRATED COILS

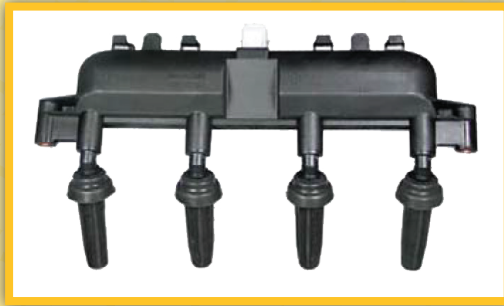

BOUGI
CORD

SUPPRESSED IGNITION CABLES
NON CARBON LOW RESISTANCE

FUNCTION OF THE COIL

The Coils fundamental function is to transform the battery tension's energy into a high voltage signal which is able to generate a spark at the tip of the Spark Plug inside the engine combustion chamber. Conceptualised for static ignition applications in severe environment conditions, the main advantages of the Coil are energy efficiency, weight reduction and engine assembly facilitation.

COIL TYPES

INTEGRATED IGNITION UNIT COIL

This Coil is suitable for all Engines with a mono or twin static ignition approach. All high voltage connections are secured with one single operation when fitted to the Engine which offers reliable and uniform connectivity.

TOP-PLUG COIL (OR MUSHROOM COIL)

This Coil is similar to the Pencil Coil apart from for the incorporated electronics which protrudes from the Spark Plug well area. Furthermore this Coil is also known to be used on Aeroplane Engines.

PENCIL COIL

This Coil is intended for mono static ignition applications and integrates one coil per Spark Plug. The slim design of this Coil allows applications into small Spark Plug well diameters and Engine design restricted areas.

PENCIL OR TOP PLUG IN RACK COIL

This Coil combines the advantages and features of the Integrated Ignition Unit Coil and Top-Plug Coil.

INDEX

General Information 2

Vehicle to Coil 3

Coil to Vehicle 38

Legal Notice:

This catalogue has been compiled in accordance with the South African vehicle fleet Engine design and Ignition demand at the time of printing. ABES Technoseal reserves the right to alter any content without prior notice. Images here within are for illustrations only and no-contractual. Any reproduction of this catalogue, either partial or entirely, is strictly prohibited without authorisation from ABES Technoseal.

Warranty:

All products supplied by ABES Technoseal within this catalogue comply with existing automotive manufacturing standards and specifications.

ABES Technoseal shall not be held liable for any consequential damages resulting from the use of wrongly delivered goods.

ABES Technoseal warrants its Ignition goods for a period of 1 year or 60,000km, whichever ever period occurs first and agrees to, in the event of a warranty claim, replacement of parts if found to be faulty, and subject to there being no negligence by the Customer in the handling, use, or application of the goods.

COIL ON PLUG INFORMATION

WHY REPLACE A COIL?

A defected ignition Coil can result in technical and/or electronic damages

First symptoms:

- Increased fuel consumption and carbon dioxide emission
- Difficult engine start in cold and/or humid weather conditions
- Occurrence of engine flat spots and power loss during accelerations
- Engine cut-out frequently

Consequences:

- No engine start
- Damage to the engine spark plugs and vehicle battery
- Damage to the electronic control unit and on-board electronics

DID YOU KNOW?

A similar device, today known as the Coil, was already designed and developed by Ruhmkorff in 1864 with the intention to obtain a strong electric discharge by using a weak current.

Ignition Coils have been in use since 1913 in the automotive industry, initially in the United States only.

Improvements are mostly linked to technological or material advances and the need for adapting the ignition spark based upon engine performance requirements.
